TO THE HON^{BLE} E. TANNER,
Minister of Lands and Mines.

SIR:

I herewith submit the report of The Mines Branch for the year ending December 31, 1944.

Respectfully Submitted,

JOHN CRAWFORD,
Chief Inspector of Mines.

ANNUAL REPORT OF THE MINES BRANCH FOR THE YEAR
ENDING DECEMBER 31, 1944

(JOHN CRAWFORD, *Chief Inspector*)

The output of coal produced from mines in the Province during the year was 7,427,433 tons, with a valuation of \$26,741,357. This valuation shows an increase of \$2,706,236 over \$24,035,121 for 1943.

The disposition of coal during the year was as follows:

	Tons
Sold for consumption in Alberta	1,424,293
Sold for consumption in other Provinces	2,447,225
Sold to Alaska	1,064
Sold to the United States	266,664
Sold to railroad companies	2,583,101
Used in ship's bunkers	20,296
Used making briquettes	239,608
Used making coke	101,633
Used under colliery boilers	172,374
Used by colliery railroads	5,659
Put to stock	40,649
Put to waste	152,276

The above tonnages include coal lifted from stock and waste heaps, which is not included in the total output.

Of the above output, 766,372 tons were produced by 45 strip pits operating in the Province.

It will be noted in table showing the disposition of coal during the year, that two new outlets are shown, Alaska and ship's bunkers. While the tonnages shown are not large, the trend is highly desirable and increased tonnages hoped for.

In addition to the above output, there were 331 tons reported as mined by farmers under permit, for their own use.

During the year, 4 shale pits produced 45,360 tons of shale and clay, from which 15,519,048 bricks and 8,523 tons of hollow tile were made. The production of shale and clay has increased by 14,928 tons during the year, and the number of bricks made has increased by 3,981,246. A very significant increase in hollow tile is evidenced, amounting to 5,023 tons. These figures present an exceedingly bright picture for the clay products industry.

There were 202 mines producing coal during the year, of which 5 were opened, 13 re-opened, 11 abandoned, and 42 closed. At December 31st, 1944, 180 mines were in operation.

There were 8,943 men employed during the month of December, this being an increase of 307 for the corresponding month of 1943.

The number of Emergency Coal Miners' Certificates issued by the Branch during the year is substantially the same as last year, and same have been of great assistance to the mines during this trying period of man-power shortage. To December 31st, 591 of these certificates were issued.

Samples of mine air were taken during the year by the Inspectors, and sent to the Chemistry Branch of the Department of Mines, Ottawa, for analysis. This has been done in addition to tests made with M.S.A. Methane and other gas detectors.

Samples of coal were collected and forwarded to the Industrial Research Council, University of Alberta, for analysis.

All fatal and serious accidents have been investigated by the Inspectors, who also attended the inquests held in their districts, this being in addition to the regular inspection of the mines. All complaints made to the Department were also investigated.

There were 14 prosecutions instituted for contravention of The Mines Act, made up as follows: 2 chute loaders, 1 stopping builder, 1 mine manager, 2 drivers, 4 miners, 1 fireboss, 1 rollerman, 1 labourer, 1 farmer.

The increase in the use of protective equipment in the mines of the Province during the year is very satisfactory. This equipment is reported as 4,333 hard hats, 2,496 pair of safety shoes, 758 pair of goggles, and 271 pair of knee caps. This shows an increase of 848 hard hats, 350 pair of safety shoes, 433 pair of goggles and 236 pair of knee caps.

The purchased electrical power by the mines was 39,349,384 k.w. hours, which shows a small drop from the previous year.

During the year all the electrical plants and equipment at the mines were inspected, and at the end of 1944 there were 76 mines that were electrified, and in addition 6 mines have electric mine lamps, signals or telephones.

The following mines were electrified during the year: Castle Coal Co., Ltd., Wayne; Reliance Mine, Delia; Black Nugget Coal Co., Ltd., Dodds; D. J. Gwilliam, Namao; Birnwell Coal, Ltd., Eyremore; Majestic Mines, Ltd., Taber; Western Ventures, Ltd., Taber; Continental Coal Co., Ltd., Grassy Lake.

A great deal of new equipment has been installed in and around the mines during the year. This equipment will be found listed under the District Inspectorate reports. It should be noted that electrification and mechanization of the mines moves forward in very close step. This indicates definitely that a spirit of progress and expansion is rapidly unfolding in the various mining regions of the Province.

A number of strikes have taken place during the year, but they were all concerned with local issues and did not disturb production to any great extent.

I am pleased to report that the number of fatal accidents for the year was 10, compared with 25 for 1943, showing a reduction of 60 per cent. It should also be noted that for each fatal accident in the Province, 742, 743 tons of coal were produced. In view of the large tonnage of coal produced, this can be considered as a very remarkable experience.

Five fatal accidents were due to haulage, three to falls of top coal, one to cave of roof, and one from coal and timber coming down on workman while bucking coal in a chute.

While the industry has had its man-power problems, we cannot rightly say that any serious loss in production has taken place on this account, as the trend toward mechanization has to a great extent, offset the man-power shortage. A great deal of credit is due to all concerned, in being able to carry the demand load in a very satisfactory manner, through a most difficult year, without loss of production due to operating causes.

During the year the following changes took place in the Inspectorate: Mr. A. A. Millar resigned as Chief Inspector of Mines to take the position of General Manager for the West Canadian Collieries,

Ltd., at Blairmore, and was succeeded by Mr. John Crawford; Mr. A. B. Hunter took over the duties of District Inspector for the Edmonton-Camrose area; Mr. J. A. Dutton was appointed Assistant Chief Inspector of Mines, and was succeeded by Mr. J. D. B. Brown, formerly of the Alexo Coal Co., Ltd., as District Inspector of Mines for the Drumheller area.

SUMMARY OF INFORMATION, COMPILED FROM THE REPORTS OF THE DISTRICT INSPECTORS

(J. A. DUTTON, *Assistant Chief Inspector, Edmonton*)

At the commencement of the year, I held the position of District Inspector of Mines for the Drumheller Area, which position I held until my appointment in June to Assistant Chief Inspector of Mines.

In the Drumheller Area, 48 complete mine inspections were made, in addition to inspections made to investigate the cause of serious and fatal accidents.

On January 4th, Geo. Brown, driver, employed at the mine operated by the Regal Coal Co., Ltd., East Coulee, slipped and rolled under an empty mine car, causing fractured pelvis, from the effects of which he died two days later.

On May 29th, Roland Levesque, driver, employed by the Commander Coal Co., Drumheller, was found dead in the mine under a loaded car. The cause of this accident is unknown. Death was due to asphyxiation, broken ribs and lacerations.

In addition to attending inquests held on the above fatalities, an inquest was also held on January 4th to inquire into the death of Julius Neilsen, who was killed in a mine accident on December 29th, 1943.

I presided at examinations for third class certificates, also first class and mine surveyors' certificates of competency, held in Drumheller on May 30th and June 6, 7 and 8.

After my appointment to Assistant Chief Inspector of Mines, in addition to these duties, 17 mines were transferred from Mr. A. B. Hunter to my charge. Three are in the Whitecourt Area, five in the Pembina Area, six in the Harcourt Area, two in the High Prairie Area and one classified as No Area.

There were only 11 of these mines in operation during the year.

All the mines mentioned above are small mines within the meaning of The Mines Act, and I am pleased to report that there were no fatalities or serious accidents reported. Each mine operating was inspected once by myself during the latter half of 1944.

An official visit was made to the Newcastle Collieries, Ltd., Mine No. 620, at Drumheller, on December 20th, as the result of a mine fire believed to be caused by the arcing of electric wires, resulting from a small cave. The fire area is now sealed off and has every indication of being inactive.

Four other visits were made to mines in the Edmonton area to investigate complaints and serious accidents.

A new strip mines is to be opened up early in January, 1945, a few miles south of the southern border of the Harcourt Area, and 35 miles southwest of Grande Prairie, and this mine will be known on our records as the Pinto Creek Collieries.

EDMONTON-CAMROSE INSPECTION DISTRICT

(A. B. HUNTER, *District Office, Edmonton*)

There was only one ignition of gas, which occurred at a prospect shaft sunk by M. Sinoski on L.S.D. 15 of Section 23, Township 51, Range 25, West of the 4th Meridian, near Ellerslie, on July 17th, when Herman Burchat, a miner, struck a match at the bottom of the shaft, causing slight burns to himself on face and hands. Previous tests for gas were reported to have been made from time to time, which had not disclosed its presence. The shaft was sunk to a depth of 80 feet to where the seam had been penetrated, and exposed a small feeder of Methane gas. The mine was immediately put on a safety lamp basis.

The following new installations were made during the year:

Mine No. 1357, Red Hot Coal Co., Ltd., Edmonton, has electrified the mine to include the operation of coal-cutters, pumps, hoist and fan.

Mine No. 1366, Beverly Coal Co., Ltd., Edmonton, installed a new coal crusher to meet the demand for stoker coal.

Mine No. 1393, Ottewell Coal Co., Clover Bar, installed a gasoline loader and a bulldozer for stripping operations.

Mine No. 1496, D. J. Gwilliam, Namao, introduced electricity to operate a surface fan used for mine ventilation.

Mine No. 1316, Samis Collieries, introduced electricity in the mine for the purposes of coal-cutting, pumping and mine ventilation.

Mine No. 1266, Edmonton Collieries, Ltd., Namao, has introduced electricity in the mine, and they are using it at present for pumping water.

Mine No. 1582, Egg Lake Coal Co., Morinville, has erected a small tippie and a gasoline hoist.

Mine No. 1322, John Lynass, Delburne has built a small tippie and installed a weigh pan.

Mine No. 251, John Tyrlik, Heisler, has built a small tippie at his new opening and installed a gasoline hoist.

Mine No. 289, Bailey and Skage, has erected a tippie at the new shaft and installed a skeep in the shaft.

Mine No. 1240, W. T. and W. J. Phillips, Castor, has installed a larger air compressor on the surface.

Mine No. 1046, J. F. Cordel, Halkirk, has installed a new Ingersoll-Radial coal cutter.

Mine No. 1107, Black Nugget Coal Co., Ltd., has built a new ramp and tippie with screens, operated electrically by purchased power.

At the beginning of the year, there were 108 mines in this district, of which 21 were transferred as follows: 10 mines to the District Inspector at Drumheller, Mines Nos. 864, Big Valley Area, Nos. 113, 384, 690, 710, 921, 1226, 1283, 1499 and 1538, Carbon Area; 11 mines were transferred to Mr. Dutton, Assistant Chief Inspector, these being all mines in Halcourt, High Prairie and Whitecourt Areas.

There were 4 mines abandoned during the year: Nos. 155, Dawson Coal, Ltd., Edmonton; 244, Stoney Creek Collieries, Ltd., Camrose; 707, Bush Mines, Ltd., Beverly; and 1492, John May, Ellerslie.

During the year there were two new mines opened, 724 S. H. Burnstad and 1618 A. T. Miner, and four mines closed temporarily, Nos. 255 F. A. Straub, 760 Red Flame Coal Co., Ltd., 1376 J. A. Ginther, and 1606 H. H. Wright.

Mine No. 289 was taken over by Bailey & Skaug, No. 1297 by R. Klapstein, 1595 by the Yellowknife Transport Company, 1107 by the Black Nugget Coal Co., Ltd., and 1206 by Binder, Sacharak and Bozniak.

Twelve Domestic Coal Permits were issued to farmers to strip coal for their own use.

There were 15 accidents reported during the year as follows:

Mine No. 29—B. Nugent, leg injury, struck by empty car at bottom of slope.

Mine No. 99—Joseph Walters, fractured leg, kicked by a horse; Alex Cormack, fractured foot caused by fall of rock; James Farmer, fractured toes caused by fall of rock.

Mine No. 428—Steve Hryciw, fractured finger, bumped hand against prop; Ernest Pallier, fractured ankle, struck by runaway car; Peter Uchacz, fractured finger, struck by an axe; Frank Toth, fractured arm caused by fall of rock; John Zahary, fractured finger, hand bumped by timber; Jack Jackson, fractured toe caused by fall of rock.

Mine No. 1034—John Chimera, fractured leg, clipped from ladder at bottom of sinking shaft.

Mine No. 1098—Mike Vitaly, fractured leg, arm and chest, caused by fall of rock.

Mine No. 1233—Herman Bouchert, slight burns on face and hands caused by ignition of gas.

Mine No. 1419—Walter Romanowski, back injuries caused by fall of rock.

Mine No. 1427—Alex Hildebrant, fractured ankle, caused by fall of rock.

Most of the mines were inspected twice during the year, making a total of 154 inspections.

During the year, 17 trades names were registered.

One road allowance lease was granted, this to the Red Flame Coal Co., Ltd., Camrose.

Two samples of coal were taken and sent to the Research Council, University of Alberta, for analysis. These were from mines Nos. 953 W. Jones and 1046 J. F. Cordel.

The regular M.S.A. and flame safety lamp tests were made at all mines where safety lamps are used.

From the Edmonton office, 20 Explosive Purchase Permits were issued, and during the year 83 Emergency Coal Miners' Certificates of Competency were issued.

There were 21 strip pits in this district—4 in Ardley Area, 5 in Camrose Area, 3 in Castor Area, 3 in Edmonton Area, 1 in Pembina Area, 2 in Rochester Area, and 3 in Tofield Area. Three pits in Tofield, one in Castor and one in Camrose all ship by rail, the others supply local trade only.

CALGARY INSPECTION DISTRICT

(W. G. HEELEY, *District Office, Calgary*)

At Mine No. 1516, operated by G. C. Davies, Priddis, a 3 ton per hour coal crusher was installed.

At Mine No. 1619, operated by B. Ainsley & Sons, Morley, a 5 ton per hour coal crusher was installed.

A 30 ton per hour briquette installation, estimated at a cost of [REDACTED], was made at the Canmore Mines, Ltd., Camrose, also a new tippie, hoist, Sullivan electric undercutting coal cutting machine with the necessary electrical equipment and pneumatic picks. I am pleased to report the pneumatic picks now being used in this seam will improve shot-firing with better preparation for the shots. I am sure that besides improved safety from these picks, shot-firing will be reduced.

In addition, this company is doing considerable prospecting work at Georgetown.

There were 28 mines in the district, two of which were abandoned and one re-opened. Two mines were taken over by new operators and one temporarily closed.

During the year there was one prosecution instituted for a contravention of The Mines Act.

There were 20 accidents reported to the District Office, 5 being serious and 15 slight. All serious accidents were investigated, this being in addition to the regular inspections made.

During the year, 116 regular inspections were made, and in addition, I visited Greenhill, Bellevue, International and McGillivray Creek mines, and accompanied the Edson District Inspector to the explosion at Luscar.

Four trade names were registered during the year.

Two road allowance leases were granted, both to the Canmore Mines, Ltd., Canmore.

Three samples of coal were taken and sent to the Research Council, University of Alberta, for analysis.

From the Calgary office, 20 Explosive Purchase Permits were issued, and during the year 100 Emergency Miners' Certificates were issued in this district.

Three Domestic Coal Permits were issued to farmers to strip coal for their own use. About 300 tons of coal were stripped at one pit at Beynon during the year.

It will be interesting to note there were no labour troubles and no shut-downs in this district during 1944.

At Mine No. 1244, operated by Frank Wheatley & Sons, Banff, the new Edison P type safety lamps are being used. Very few explosives are used in this mine, the coal being mined by pneumatic air picks. All the power used is compressed air, and the mine is in good condition.

The Canada Cement Co., Ltd., operated a shale pit at Seebe. It is a strip pit, and the output varies according to the demand for cement.

Mine No. 256, operated by Brazeau Collieries, Ltd., Nordegg, operating in No. 3 seam, is a safety lamp mine using the P type

Edison electric lamps. No shot-firing is being done in this mine, the coal being mined entirely by pneumatic air picks.

Mine No. 1585, operated by Brazeau Collieries, Ltd., Nordegg, operating in No. 2 seam, is also a safety lamp mine using the P type Edison electric lamps. No shot-firing is done in this mine, the output being mined by pneumatic air picks. A new briquetting unit is under erection at this mine, which is now producing about 650 tons of briquettes per day, and it is expected the new installation will produce 1,100 tons per day.

The Peerless Mine, operated by H. R. Brown at Carbon, Mine No. 1600, is an open light mine producing around 80 tons per day. The coal is machine mined, using Pellet powder for blasting.

Mine No. 1359, operated by Balogh Bros., Carbon, is an open light mine using Pellet powder for blasting. The coal is mined and sheared by a Universal machine. The production is about 25 tons per day, but could be more if miners were available.

Mine No. 1060, East Carbon Mine, operated by Fox Bros., Carbon, is also an open light mine. The coal is machine mined by a Sullivan electric undercutter. They are drawing pillars in the entrance to the north side of the Coulee, and are commencing operations on the south side, using the same tippie for both operations.

The Sovereign Coal mining Co., Ltd., Wayne, Mine No. 1570, is an open light mine using Pellet powder for blasting. The coal is undercut by a Sullivan electric machine.

Mine No. 1544, operated by the Castel Coal Co., Ltd., Wayne, is also an open light mine using Pellet powder for blasting. The coal is mined by a Sullivan undercutting electric machine.

The Western Gem & Jewel Collieries, Ltd., Cambria, is an open light mine using Pellet powder for blasting. The coal is mined by electric undercutting machines.

LETHBRIDGE INSPECTION DISTRICT

(W. E. G. HALL, *District Office, Lethbridge*)

At the Standard and Galt Mines of Lethbridge Collieries, Ltd., there have been installed 500 Model P Edison electric cap lamps and 24 approved shot-firing attachments for this type of lamp. Of the 500 lamps, 275 are in use at the Galt Mine and the balance at the Standard. The shot-firing attachments were distributed in the same ratio.

Also at the Galt Mine there were 2 blower fans equipped with flame-proof motors installed, and one stage 200 G.P.M. centrifugal pump driven by a 15 H.P. motor of the flame-proof type was also put in service. A main and tail electrically driven haulage unit was installed on 23 Butt, No. 1 Face, N.E.

At the Standard Mine the following improvements and additions have also been made: 2 Jeffrey Midget Aerodyne fans have been put in use underground; 1 endless rope haulage unit on 9 Face entry; 1 main and tail haulage unit for use on No. 12 Butt, No. 3 Face entry, this being a temporary installation; 3 Link Belt electrically driven gear reduction units have been placed on the tippie, replacing gear reductions and chain driven units.

Thos. Taylor, Mine No. 1301, has installed a 2 cylinder 6"×10" air compressor, driven by a portable tractor.

At Mine No. 1095, operated by J. C. Chester, a new centrifugal pump with flame-proof motor and starter, has been installed, with a 10 H.P. motor, also a single drum hoist to pull the loads to the slope bottom. The rope and empties are pulled back by horse haulage. This is a temporary installation until a main and tail can be obtained.

At the J. J. Hamilton Coal Co. mine No. 1581, a new main shaft has been equipped with an electrically driven hoist and a new cage. An armoured cable has been hung in the shaft and energized. An old building, 16'×12', has been converted into a wash-house with 2 showers and 24 hangers, also a 2 stage 120 G.P.M. centrifugal pump driven by a 20 H.P. flame-proof motor, has been installed in this mine.

There were 28 mines operating in this district during the year, and 4 shale pits. Four mines were closed and four were abandoned, leaving 20 in operation at December 31st.

Two mines were taken over by new operators—Mine No. 1219, Lethbridge, by T. Hagblad, and No. 1536 by L. Oliver, Taber.

During the year, 36 serious accidents were reported to the District Office. The decrease in the number of accidents can be partially attributed to the increased use of protective equipment.

Two trade names were registered during the year, and six road allowance leases were granted by the Branch to mines in this district.

Seven samples of coal were collected and sent to the Research Council, University of Alberta, for analysis. No mine air samples were taken, but tests for gas were made in all mines with flame safety lamps and other approved gas testing devices.

There was one prosecution, same being for illegal mining, and a conviction was obtained.

During the year, 23 Explosive Purchase Permits were issued by the District Office during the year.

I presided at examinations for first, second and third class and mine surveyors' certificates, held at Lethbridge on June 6, 7 and 8.

During the year, 83 Emergency Coal Miners' Certificates were issued, this being an increase of 18 per cent over 1943.

There were 78 inspections made of the mines during the year, in addition to those regarding serious accidents, and all complaints made to the Department were also investigated.

During the year no labour trouble was reported, but the mines in this district suffered slack time for the first four months of the year, which materially affected the production of the underground mines near the City of Lethbridge, but this loss has been more or less taken up by the production from the strip mines.

Of the eight strip coal mines in operation during the year 1943, five are still producing. One has been worked out, one closed, and the third not operating, although it has a considerable tonnage of coal uncovered. The five strip pits operating have facilities for shipping by rail.

At the strip pits the following installations and additions have been made. Mine No. 1334, operated by the Continental Coal Corporation, Ltd., the tippie has been enlarged to double its former capacity by the addition of a new lump screen, an 18-inch belt conveyor, a Tyroc vibrating screen, and a new elevator.

At Mine No. 1404, operated by the Birnwel Coal, Ltd., a new tippie has been constructed with a capacity of 1,500 tons per day, where five sizes of coal are screened.

CROWSNEST INSPECTION DISTRICT

(E. H. MORGAN, *District Office, Blairmore*)

The fire which was first observed at the Greenhill Mine of the West Canadian Collieries, Ltd., Blairmore, on Monday, October 25th, 1943, was finally sealed off in April, 1944. This was done in a manner that it cannot cause any further danger.

At the Bellevue Mine of the same company, at the outcrop of their No. 1 seam, just north of their No. 8 slope hoist, on Saturday, November 4th, some smoke was seen to be rising from the edge. The matter was immediately investigated, and revealed that a small fire had started in one of the holes produced by caving. Seemingly, town refuse had been dumped into some of the cave holes without the knowledge of the company officials, and the fire was immediately put out, and an order has been sent to the town officials prohibiting the dumping of any refuse by any of their employees on any part of the West Canadian property. This fire, if it had passed unnoticed for a few days, could easily have produced a very unpleasant and costly experience. As an added precaution, all accessible cave holes at the surface are being filled with rock and other non-inflammable material.

West Canadian Collieries, Ltd., Bellevue, Mine No. 87, have installed new and better brakes on each of their air locomotives, built a new bridge over the river for hauling coal to their tippie from their Adanac mine, built a new furnace and changed the driers at the tippie, and erected a new building for housing them. They have put in two new Dillon de-watering screens, and below ground they have a new Denver loader for loading entry coal at their No. 9 level, and installed an automatic switch on No. 8 slope.

At the International Mine No. 88, a new hoist house, 27' by 33', and a 350 H.P. single drum electric hoist have been installed at York Creek. The building consists of a stuccoed hollow tile walls and corrugated sheet iron roof. The 6'0" by 3'0" double inlet reversible Jeffrey fan, originally installed at No. 98 airway, has been moved and installed at their new York Creek airway at No. 151 room, and a new brick building erected to house the electric motor and drive. A 6,600 volt power line and transformers to provide electric power for the York Creek area have been installed from their own sub-station to their hoist house at York Creek. New screening equipment and conveyors for handling their fines have been installed at the tippie, and will be operating soon. They have also installed new and better brakes on each of their air locomotives.

At the Mohawk Mine No. 133, Bellevue, they have built practically a new tippie, at least 75% of it has been changed. The entire building, which is 40 feet by 65 feet by 40 feet high, is constructed of reinforced concrete and tile brick, and it is heated throughout by a H.R.T. steam boiler. The washery consists of a 4'6" Vissac jig, having a capacity of 100 tons per hour, of coal sizes from 1¼" to 4½". The raw coal coming from the mine is screened to 1¼", and the coal over 4½" is reduced to 4½" and under by means of a double roll breaker, and it is then passed over a double deck Tyrock

screen, thus removing any fines produced in the breaking process. Fireproof switch rooms have been built to house the starting equipment for all motors on the air tables floor and the Marcus screen floors. These motors are now operated by remote control. Armoured cables are used to connect the motors to the switch rooms.

At the McGillivray Creek Mine No. 204, a hollow tile pump house, 13' by 16', to house a 600 G.P.M. centrifugal pump, has been built recently. This pump is driven by a 75 H.P. motor. They have installed new and better brakes on each of their air locomotives. Note: Mines Nos. 87, 88 and 204 are the only mines in this area using air locomotives.

At the Greenhill Mine No. 396, of West Canadian Collieries, Ltd., Blairmore, a new drier for $\frac{1}{4}$ " coal, and the necessary conveyors and two new Cyclones for collecting the dust, have been installed at the tippie. A compressed air hoist has been erected for hoisting coal from a new slope that is being driven in the No. 2 seam, to be later replaced by an electric hoist. An elaborate concrete portal has been built at the entrance to No. 5 level to the No. 2 seam; the haulage road has been re-timbered with steel arches, and the track is all 60 lb. steel.

At the Adanac Mine No. 1584 of this company, a new 24' by 16' frame compressor house, housing two Diesel driven compressors, each having a capacity of 360 c.f.p.m., has been built. Two Gardner Denver loaders are being used for loading coal in driving entries.

There were eight mines operating in this district during the year 1944.

Eight prosecutions were instituted for contraventions under The Mines Act as follows: 2 at the International Mine, 3 at the Mohawk Mine, 1 at the McGillivray Creek Mine, and 2 at the Greenhill Mine.

There were 41 accidents reported to the District Office during the year—4 fatal, 30 serious, and 6 slight. All fatal and serious accidents were investigated, this being in addition to the regular inspections of the mines. Each working place in the larger mines was inspected at least four times during the year, making 103 inspections in all.

There were two trade names registered by the Branch during the year. Two road allowance leases were granted, both to West Canadian Collieries, Ltd., Greenhill Mine, Blairmore.

One sample of coal was collected from the Adanac Mine No. 1584, of West Canadian Collieries, Ltd., Bellevue, and forwarded to the Research Council of Alberta, University of Alberta, for analysis.

Between January and September, 59 samples of mine air were taken from the Greenhill Mine, in and around the fire area, and forwarded to the Chemistry Branch of the Department of Mines and Resources, Ottawa, for analysis.

Seven Explosive Purchase Permits were issued by the District Office during the year, and 120 Emergency Coal Miners' Certificates were issued for this district.

The usual high standard of mine rescue and first aid training is being maintained at the various mines. The use of protective equipment is very satisfactory, but still could be improved on.

A few labour disputes caused a day or so stoppage of work on three occasions at the Bellevue and Mohawk mines.

COALSPUR-MOUNTAIN PARK INSPECTION DISTRICT

(A. MUIR, *District Office, Edson*)

On June 21st, at the Luscar Coals, Ltd., an explosion occurred which injured two persons. Due to heavy precipitation, the airway to the No. 4 west fan-house caved, and was filled with clay on June 15th. The airway below the cave thus became filled with gas. Timbermen began cleaning up the cave on June 16th, and by June 20th had reached a point where a small gas seepage began. This seepage rose to and filled the fan-house, and the two injured persons who were trespassing in the vicinity ignited the gas, causing an explosion.

On July 22nd, a fire occurred underground in the worked-out area of the 6 west entry, No. 2 panel in the No. 1 mine of the Luscar Coals, Ltd. The fire was caused by spontaneous combustion, and was quickly sealed off with concrete stoppings.

On May 3rd the tipple and surface buildings at the Lakeside Coals, Ltd., Robb, were completely destroyed by fire.

On October 29th, the tipple and surface plant at the Coal Valley Mining Co., Ltd., were completely destroyed by fire.

At the Mountain Park Coals, Ltd., Mine No. 282, a 200 H.P. 3600 R.P.M. Canadian Allis Chalmers pump has been put into service underground. A new garage has also been built to accommodate six trucks.

At the Cadomin Coal Co., Ltd., Mine No. 693, a 17-passenger bus has been put into service to transport workmen to and from their work. A power line and telephone line have been installed to the West Mine, and a 60 ton coal bin has been erected.

At Luscar Coals, Ltd., Mine No. 905, a Byron-Jackson centrifugal pump, operating at 3600 R.P.M., driven by a 150 H.P. 550 volt motor, has been installed on their main slope. Three new International 5 ton trucks were put into service hauling coal from their Nos. 2 and 3 mines, to the tipple.

A picking table was put into service at the K-D Collieries, Ltd., Mine No. 1392, at Kaydee.

Lakeside Coals, Ltd., Mine No. 775, has erected a temporary tipple, and a new power plant has been built to replace the one destroyed by fire.

At the Foothills Collieries, Ltd., Mine No. 771, two radial coal cutters and an air compressor have been put into service, also one Sheldon booster fan and motor, and one 2½ ton I.H.C. dump truck.

At the beginning of the year there were 19 mines in the district, of which 6 were transferred to Mr. Dutton, Assistant Chief Inspector of Mines, these being all mines in the Pembina and Whitecourt Areas. Mine No. 1157, operated by the Thirty-two Collieries, Ltd., was temporarily closed.

There were two prosecutions instituted under The Mines Act, both at Mine No. 846, McLeod River Hard Coal Co. (1941), Ltd., Mercoal.

On July 17th, Joe Gagar was fatally injured by a fall of coal at Mine No. 846, and on Nov. 17th, A. Ukergi was buried by a cave-in, in the pillar workings of the No. 2 slope, at Mine No. 282.

A total of 46 accidents were reported to the District Office during the year. All fatal and serious accidents were, investigated and all inquests attended, this being in addition to the regular inspection of the mines.

All complaints made to the Department were also investigated.

During the year one road allowance lease was granted, to the Foothills Collieries, Ltd., Foothills.

The District Office issued 15 Explosive Purchase Permits.

There were 76 complete mine inspections made during the year, in addition to other visits to mines on official business.

Mine No. 693 has opened a strip operation. The overburden is removed by Letourneau scrapers, and the coal loaded by power shovel into trucks, which transport same to the tippie. Two lifts of 20 feet each have been made, and the third lift of 20 feet has been started.

The use of explosives for blasing has been greatly reduced in this district.

All the mines have been free of any serious labour trouble during the year, but the labour shortage is still serious, and has affected the output to some extent.

DRUMHELLER INSPECTION DISTRICT

(J. D. B. BROWN, *District Office, Drumheller*)

A small mine fire occurred at the Red Deer Valley Mine on September 18th, which was caused by a fall of roof on the electric cables, which bared same, causing a short circuit, igniting some timber. This was quickly extinguished.

There was a small ignition of coal at the face of 2 A east entry in the Hy-Grade Mine on December 1st, due to a shot-hole charged with Pellet powder. A fissure filled with fine coal was ignited with the flame from the shot, but was quickly extinguished with water.

On December 18th, a serious fire occurred at the Newcastle Mine, in the vicinity of the transformer house. This fire had gained too extensive a hold before fire fighting equipment could be brought to bear on it, and consequently attempts to deal with it by loading it out were not successful. Eventually it had to be sealed off with temporary stoppings followed with permanent seals. It was six days before the permanent seals were completed. Almost 500,000 gallons of water have been pumped into the fire area through a 6,000 foot 2" pip-line. A length of pipe 6" in diameter was let into one of the stoppings, through which a thermometer is inserted once every eight hours, and the temperature has shown a steady decrease from 110 degrees on December 24th to 86 degrees on December 31st.

The Red Deer Valley Coal Co., Ltd., Mine No. 402, has installed three 75 KVA transformers, 1 Sheldon aerovane fan with 75 H.P. Westinghouse motor, with compensator and switch; one electric Mule Mancha Battery Locomotive, with Hertna automatic battery charger, and 25 H.P. 440 volt generator; two 48 cell type Exide batteries; 3 Mecco blower fans, 5 H.P. 440 volt, 3600 R.V.P.M., fitted with Westinghouse explosion proof motors; 100 KVA 3 phase 2300 440 volt Pyranol transformers, and 3 oil circuit breakers.

The Newcastle Collieries, Ltd., Mine No. 620, has installed four 25 KVA 2300, 440 volt transformers and one 50 KVA 2300, 440 volt

Pyranol transformer to replace those lost in the fire, also one permissible coal drill.

The Monarch Coal Mining Co., Ltd., operating mines Nos. 1473 and 1573, have built a washhouse, machine shop, locomotive shop and charging station for same, a 3-car garage, all of fireproof construction, also a cement water tank of 10,000 gals. capacity, and have a 4" pipe-line for fire protection and water supply. Extensive alterations have been made to the mine tippie, also concrete foundations laid for railway tippie. An automatic Philips dump and Philips Pushback dump, 1 Goodman shaker conveyor, 1 Jeffrey locomotive, 1 Chicago permissible coal drill and a 3-ton International truck have also been put into service. In addition, they have installed a Cardox plant.

An addition to the office containing lamp house, first aid room, enlargement of previous first aid room to convert to drafting room, has been made by the Midland Coal Mining Co., Ltd., Mine No. 367. They have also installed 1 type 7B Sullivan coal undercutter and 1 Mancha battery locomotive.

At the Rosedale Collieries, Ltd., Mine No. 346, a Rigid post type box car loader and shed for same has been installed on the surface, and a generator set for the trolley locomotive underground in the new east district.

The Commander Coal Company, Mine No. 422, has installed 50 Edison lamps, Model P, 2 Post mounted rigid post type box-car loaders for smaller sizes, 30, 3-ton roller bearing mine cars; 1 motor generator set, 150 H.P. 2300, 100 KW 250 volt D.C.; 1 Goodman 13-ton trolley locomotive, 1 Sullivan 7 AU Universal type coal cutter, and one 10 H.P. centrifugal pump.

The Brilliant Coal Co. has built an extension to the wash-house and a new machine shop, and installed a Crane projection heater on the tippie, also an automatic door, and 1 Sullivan CE 7 shortwall coal cutter.

At Mine No. 1491, operated by Murray Collieries, Ltd., one 5 ft. diameter Sheldon fan and 1, 4-ton Atlas storage battery locomotive have been installed. A first aid room has been set up at the office building.

At Mine No. 1299, of Empire Collieries, Ltd., a main and tail hoist 36 H.P. with 5,000 feet of rope on the drums, has been installed.

During the year there were 43 mines in operation in this Inspection District, of which 2 were abandoned, 3 new mines opened, 2 closed temporarily, and 3 taken over by new operators.

Two prosecutions were instituted under The Mines Act during the year.

There were 56 accidents reported to this office during the year—4 fatal and 52 serious. These accidents were all investigated, this being in addition to the regular mine inspections, and all inquests attended.

During the year, 109 inspections were made of the mines, and in addition there were several specialized inspections into fires and other official business.

Six trade names were registered by the Branch during the year. Four road allowance leases were granted for this district.

One sample of coal was taken during the year and forwarded to the Research Council, University of Alberta, for analysis.

During the year, 18 Explosive Purchase Permits were issued from this office, and a total of 76 Emergency Coal Miners' Certificates were issued in this district.

There are ten strip pits in this district. Two are at Sheerness, and produce a large tonnage. The others are small pits, with only local trade.

The district was free from labour trouble until late in the fall, when the following stoppages took place: Midland Coal Mining Co., Ltd., was idle from October 20th to November 3rd; Brilliant Coal Co. was idle from October 23rd to November 3rd. In addition, there were three one-day strikes at the Brilliant Mine, Aetna Mine and Red Deer Valley Mine, due to minor disputes.

ELECTRICAL INSPECTION OF MINES

(BURTON TAIT, *Electrical Inspector of Mines*)

During the year there were 88 electrical mines in the Province, and at the end of the year there were 82 mines using electricity, six of these having only electric mine lamps, batteries, battery charging apparatus, and electric signals or lighting.

The following mines were electrified during the year: Castle Coal Co., Ltd., Wayne; Reliance Mine, Delia; Black Nugget Coal Co., Ltd., Dodds; D. J. Gwilliam, Namao; Birnswel Coal, Ltd., Eyremore; Majestic Mines, Ltd., Taber; Western Ventures, Ltd., Taber; Continental Coal Co., Ltd., Grassy Lake.

The last four named had some electrical equipment installed temporarily the latter part of 1943, but the installations were completed in 1944.

All operating mines using electricity have received at least one complete inspection during the year, and some received two. No accidents caused by the use of electricity were reported to this office during 1944.

Two mine fires, apparently caused by the use of electricity, occurred during the year, one at the mine of the Red Deer Valley Coal Co., Ltd., Drumheller, and the other at the mine of Newcastle Collieries, Ltd., Drumheller. The first was put out without much trouble, but the second developed into a serious fire, and the mine was idle for a week.

Roof cave-ins, crushing the rubber covered conductors and partially short-circuiting same, appeared to be the cause in each case.

At Lakeside Coals, Ltd., Robb, fire destroyed the complete surface installation, power house, tippie, etc., the cause apparently being sparks from the boiler room smoke stack setting fire to the roof of the engine room.

At Coal Valley Mining Co., Ltd., Coal Valley, fire destroyed the power plant, tippie, cleaning plant, shops, etc., the cause believed to be spontaneous combustion.

At Mountain Park Coals, Ltd., Mountain Park, fire did some damage to part of the equipment in the coal cleaning plant. It would appear as if spontaneous combustion at the sludge bin was the cause.

The Board of Examiners for Mine Electricians held examinations at Edmonton July 12th, when four candidates presented themselves, three of whom passed; and on November 8th, when five candidates presented themselves, three of whom passed. No other examinations were held during the year.

The majority of electrified mines in the Province are supplied with power by Public Utility Companies. We have in addition, steam plants with a total capacity of about 8,550 KVA and Diesel and gas driven plants, mostly direct current, with a total capacity of about 430KW.

The following is an outline of some of the apparatus in use in and around the mines: 12 trolley locomotives up to 13 tons, 3 underground, 4 in tunnel through mountain; 29 battery locomotives, 20 underground; 147 electric coal cutting machines, from 3 to 80 H.P.; shaft and slope hoists with motors up to 700 H.P.; main and tail hoists with motors up to 200 H.P.; duckbill face loaders, long wall conveyors, endless rope hoists, single drum hoists, transformer installations above and below ground, coal drills, fans, pumps, motor generator sets, motor driven compressors, coal screening plants, coal cleaning plants, coal drying plants, briquette plants, saw mills, box-car loaders and rectifying apparatus.

The following electrical equipment was installed in and about the mines during 1944:

Hillcrest-Mohawk Collieries, Ltd., Bellevue:

Tipple: 1, 15-H.P. motor, 220 volts with magnetic line starter; 1, 3-H.P. motor, 220 volts with magnetic line starter. Cleaning Plant: 3 motors each 30-H.P., 220 volts, Magnetic line starter; 3 motors each 20-H.P., 220 volts, magnetic line starter; 3 motors each 15-H.P., 220 volts, magnetic line starter; 3 motors each 3-H.P., 220 volts, magnetic line starter; 1 motor 60-H.P., 220 volts, magnetic line starter; 1 motor 1-H.P., 220 volts, magnetic line starter; 200 Model P 3E Edison cap lamps.

West Canadian Collieries, Ltd., Blairmore:

Cleaning plant: 1, 150-H.P. 220 volt motor with oil immersed contactor starter; 1, 10-H.P., 220 volt motor with magnetic line starter; 2, 7½-H.P. 220 volt motors with magnetic line starters. Transformers: 1, 100-KVA, 2300-230/460 volt; 1, 100-KVA, 2300-575 volt; 2 each 5-KVA, 2300-115/230 volt; 1 60-H.P., 220 volt motor with compensator starter.

West Canadian Collieries, Ltd., Bellevue:

1, 300-H.P., 2300 volt synchronous motor with control panel; 1, 10-H.P., 220 volt motor with magnetic line starter; 1, 7½-H.P. 220 volt motor with magnetic line starter; 1, 5-KW, 125 volt D.C. generator; 1, 100-KVA transformer, 2300-115/230 volt. Underground: 1 pump with 40-H.P. 550 volt motor, compensator starter.

West Canadian Collieries, Ltd., Adanac Mine:

1 Diesel driven generator, 15 KW, 400 volt; 2, 2-H.P. 440 volt motors with magnetic line starters.

International Coal & Coke Co., Ltd., Coleman:

A new pole line, 660 volt from power house to York Creek; 3 150-KVA 220-6600 volt transformers; 3, 150-KVA 6600-2200 volt transformers; hoist with 250-H.P. 2300 volt motor, drum control oil immersed reversing, magnetic; 1 fan with 35-H.P. 220 volt motor and line starter; 25 Model P 3E Edison cap lamps.

Lethbridge Collieries, Ltd., No. 8 Mine, Lethbridge:

Underground: 2 fans each 10-H.P. 220 volt motors, magnetic line starter; 1 pump with 15-H.P. motor 220 volt, magnetic line starter. Above ground: 1, 3-H.P. 220 volt motor with manual motor starter; 1, 2-H.P. 220 volt motor with manual motor starter; 2, 50-KVA transformers, 2300-200 volt; 2, 15-KVA transformers, 2300-220 volt; 300 Model P 3E Edison cap lamps.

Lethbridge Collieries, Ltd., Shaughnessy:

Underground: 2 pumps each with 25-H.P. 220 volt motor, compensator; 1 fan with 5-H.P. 220 volt motor, manual motor starter; 2 Jeffrey blowers, each 2-H.P. 220 volt, manual motor starters; 2 conveyors, each 20-H.P. 220 volt, magnetic line starters.

Aboveground: 3 motors each 10 H.P. 220 volt magnetic line starters; 200 Model P 3E Edison cap lamps.

J. J. Hamilton Coal Co., Lethbridge:

Underground: 1 pump with 20-H.P. 220 volt motor, compensator starter; 1 pump with 3-H.P. 220 volt motor, manual motor starter.

Chester Mine, Lethbridge:

Underground: 1 hoist with 15-H.P. 220 volt motor, compensator starter.

New Royal View Mine, Lethbridge:

Underground: 1 hoist with 15-H.P. 220 volt motor, compensator starter.

Western Ventures, Ltd., Taber:

Tipple: 1, 15-H.P. 220 volt motor, magnetic line starter; 2, 5-H.P. 220 volt motors, magnetic line starter; 1, 7½-H.P. 220 volt motors, magnetic line starter, 1, 3-H.P. 220 volt motor, magnetic line starter. Box-car loaders: 1, 5-H.P. 220 volt motor, magnetic line starter; 1, 3-H.P. 220 volt motor, magnetic line starter.

Castor Creek Collieries, Ltd., Castor:

1 crusher with 25-H.P. 220 volt motor, magnetic line starter.

Brazeau Collieries, Ltd., Nordegg:

Briquette plants: 1, 50-H.P. 440 volt motor, compensator starter; 1, 75-H.P. 440 volt motor, compensator starter; 2, 20-H.P. 440 volt motors, compensators; 1, 7½-H.P. 440 volt motor, manual motor starter; 1, 5-H.P. 440 volt motor, manual motor starter; 1, 3-H.P. 440 volt motor, manual motor starter; 1, 2-H.P. 440 volt motor, manual motor starter; muskeg fan; 10-H.P. 440 volt motor, manual motor starter; tipple feeder; 1, 5-H.P. 440 volt motor, compensator starter; briquette bin; 1, 5-H.P. 440 volt motor, manual motor starter. Underground: 2 hoists, 7½-H.P. 440 volt motor, manual motor starters; 1 pump, 40-H.P. 440 volt motor, compensator starter; 1 pump, 15-H.P. 440 volt motor, manual motor starter; 1 pump, 5-H.P. 440 volt motor, manual motor starter; 1 pump, 3-H.P. 440 volt motor, manual motor starter; 1 fan, 1-H.P. 440 volt motor, manual motor starter.

Jasper Coals, Ltd., Drinnan:

Underground: 1 coal cutter, 30-H.P. 220 volt motor, star-delta starter; 1 pump with 5-H.P. 220 volt motor, magnetic line starter; 1 fan with 2-H.P. 220 volt motor, magnetic line starter; 1 coal drill, 1-H.P. 220 volt trigger switch.

Cadomin Coal Co., Ltd., Cadomin:

New pole line, 2300 volt, to new strip mine; 1, 20-H.P. 550 volt motor, magnetic line starter.

Mountain Park Coals, Ltd., Mountain Park:

Underground: 1 pump with 200-H.P. 550 volt motor, compensator starter. Above ground: 1 fan, 10-H.P. 550 volt motor, magnetic line starter; tipple, 1, 15-H.P. 550 volt motor, magnetic line starter.

Luscar Coals, Ltd., Luscar:

Underground: 1 pump with 150-H.P. 550 volt motor, compensator starter. Above ground: 1, 15-H.P. 550 volt motor, magnetic line starter; 2, 10-H.P. 550 volt motors, magnetic line starter; 1, 7½-H.P. 550 volt motor, magnetic line starter; 1, 5-H.P. 550 volt motor, magnetic line starter; 1 Allis Chalmers alternator, steam turbine, 940 KVA 2300 volts; 1 transformer, 25KVA, 2200-110/220; 1 transformer, 5 KVA, 2200-110/200.

McLeod River Hard Coal Co. (1941), Ltd., Mercoal:

Underground: 2 pumps, each 100-H.P. 440 volt, compensator starters.

The Foothills Collieries, Ltd., Foothills:

Underground: 1 pump with 10-H.P. 220 volt motor, magnetic line starter; 1 fan with 3-H.P. 220 volt motor, magnetic line starter.

The Canmore Mines, Ltd., Canmore:

Above ground: Tipple and briquette plant; 1, 15-H.P. 440 volt motor, magnetic starter; 3, 5-H.P. 440 volt motors, magnetic line starters.

Red Flame Coal Co., Ltd., Round Hill:

Above ground: 1 crusher, 15-H.P. 220 volt, compensator starter. Underground: 1 pump, 3-H.P. 220 volt, manual motor starter.

Murray Collieries, Ltd., East Coulee:

1, 3¾-ton Atlas battery locomotive; 1 Sullivan shearing machine, 30-H.P. 220 volts.

Camrose Collieries, Ltd., Camrose:

Tipple: 1, 15-H.P. 220 volt motor, magnetic line starter; 4, 10-H.P. 220 volt motors, magnetic line starters; 1, 7½-H.P. 220 volt motor, magnetic line starter; 1, 3-H.P. 220 volt motor, magnetic line starter; 1, 2-H.P. 220 volt motor, magnetic line starter.

Samis Collieries, Namao:

Underground: 1 coal cutter, 30-H.P. 220 volt, star-delta starter; 1 pump, 3-H.P. 220 volt, magnetic line starter. Above ground: 1 fan with 10-H.P. 220 volt motor, magnetic line starter.

Riverdale Coal Co., Ltd., Namao:

Underground: 1 pump with 1-H.P. 220 volt motor, manual motor starter; Above ground: 1 fan with 5-H.P. 220 volt motor, manual motor starter.

Red Hot Coal Co., Ltd., Edmonton:

Underground: 1 coal cutter, 30-H.P. 220 volt, star-delta starter; 1 pump with 5 H.P. 220 volt motor, manual motor starter; 1 pump with 3 H.P. 220 volt motor, manual motor starter; 50 Model P 3E Edison cap lamps.

Great West Coal Co., Ltd., Clover Bar:

Underground: 1 pump with 15-H.P. 250 volt D.C., rheostat starter. Above ground: 1, 25-H.P. 220 volt motor, compensator starter; 1, 7½-H.P. 220 volt motor, magnetic line starter; 1, 5-H.P. 220 volt motor, magnetic line starter; 1 3-H.P. 220 volt motor, magnetic line starter.

Edmonton Collieries, Ltd., Namao:

Underground: 1 pump with 3-H.P. 220 volt motor, manual motor starter; 1 pump with 2-H.P. 220 volt motor, manual motor starter.

Beverly Coal Co., Ltd., Beverly:

Underground: 1 pump with 3-H.P. 220 volt motor, magnetic line starter. Above ground: Crusher with 15-H.P. 220 volt motor, magnetic line starter.

Midland Coal Mining Co., Ltd., Drumheller:

Underground: 1 Sullivan coal cutter, 50-H.P. 440 volt motor; 1 pump, 5-H.P. 440 volt motor, magnetic line starter; 2 Permissible coal drills, 2-H.P. 220 volts.

Brilliant Coal Company, Drumheller:

Underground: 1 Sullivan coal cutter, 30-H.P. 220 volt start-delta starter. Above ground: 1 motor generator set, 3-H.P. motor, 220 volts, generator 2 KW 250 volts.

McGillivray Creek Coal & Coke Co., Ltd., Coleman:

Above ground: 1 pump with 75 H.P. 2200 volt motor, compensator starter.

Black Point Mine, Edmonton:

15 Model P 3E Edison cap lamps.

Red Deer Valley Coal Co., Ltd., Drumheller:

Underground: 1 Mancha Permissible battery locomotive, 20-H.P. 80 volts; 1 motor generator set with 25-H.P. motor, 15 KW generator; 1 Pyranol 3 phase transformer, 2300-440 volts; 3 Meco fans, each 5-H.P. 440 volts, manual motor starters. Above ground, at No. 1 slope: 3, 75-KVA transformers 13,200-2300 volts; 2, 37.5-KVA transformers 13,200-400 volts; main fan, 75-H.P. 440 volts, automatic compensator starter; No. 2 slope hoist, 15-H.P. 440 volt, manual across line starter; box-car puller, 15-H.P. 440 volt, liquid controller;

rock dump hoist, 15-H.P. 440 volt, magnetic line starter; well pump, 10-H.P. 440 volt magnetic line starter; 1 fan with 3-H.P. 440 volt motor, magnetic line starter; 3 Trane Unit heaters, each ¼-H.P. 220 volts; 1 fan with 1-H.P. 220 volt motor, magnetic line starter.

Commander Coal Co., Drumheller:

Underground: 1 Goodman 13-ton trolley locomotive; 1 motor generator set, motor 150-H.P. 2300 volts, gen. 100 KW; 1 Sullivan 7 AU combination coal cutter, 80-H.P. 220 volts; 1, 50-KVA 3 phase transformer, 2300-110/220 volts; 8 blower fans, each 1-H.P. 220 volts, manual motor starters. Above ground: 1, 2-speed fan 25/6.5-H.P. 220 volts, magnetic line starter; 1 motor generator set with 7½-H.P. 220 volt motor; 1, 25-H.P. 220 volt motor, magnetic line starter; 1, 20-H.P. 220 volt motor, magnetic line starter; 25-H.P. 220 volt motors, magnetic line starters; 4, 3-H.P. 220 volt motors, magnetic line starters; 2, 2-H.P. 220 volt motors, magnetic line starters; 180 Model P 3E Edison cap lamps.

Empire Collieries, Ltd., East Coulee:

Underground: 1 main and tail hoist, 35 H.P. 220 volt compensator starter.

Monarch Coal Mining Co., Ltd., Western Crown Mine, East Coulee:

Underground: 1 Jeffrey battery locomotive (transferred from Monarch Mine); 1 Goodman duckbill loader, 20-H.P. 220 volt, magnetic starter; 1 fan with 3-H.P. 220 volt motor, manual motor starter; 1 coal drill, Little Giant, 220 volt, 1-H.P.. Above ground: motor generator set with 16-H.P. 220 volt motor; 1, 15-H.P. 220 volt motor, compensator starter; 1, 15-H.P. 220 volt motor, manual motor starter; compressor, 5-H.P. 220 volt, manual motor starter.

Castle Coal Co., Ltd., Wayne:

Underground: 1 coal cutter, 30-H.P. 220 volt, star-delta starter; 1 fan with 3-H.P. 220 volt motor, manual motor starter. Above ground: 2 transformers, 25-KVA, 2300-110/220; 2, 10-H.P. 220 volt motors, manual across line starters.

Rosedale Collieries, Ltd., Aerial:

1 coal cutter, 30-H.P. 440 volt, across line starter; 1 fan, 10-H.P. 440 volt motor, manual motor starter.

Hy-Grade Coal Mining Co., Ltd., Drumheller:

200 Model P 3E Edison cap lamps.

Pine Creek Mine, Edmonton:

25 Model P 3E Edison cap lamps.

New installations put in during the year have been well installed. In above ground installations, standard requirements, as laid down in the Canadian Electrical Code, have been followed.

New pole lines involving several miles of lines have been erected to supply fans, hoists, compressors, etc., at new prospects at the following mines: West Canadian Collieries, Ltd., Blairmore and Bellevue; International Coal & Coks, Co., Ltd., Coleman; Cadomin Coal Co., Ltd., Cadomin; Luscar Coals, Ltd., Luscar.

Protection of circuits, grounding of non-current carrying parts of apparatus, proper maintenance of equipment and reporting on condition of same has received attention and the necessity of this impressed on managers and electricians. Very good co-operation has been received in most cases, from the officials.

ANNUAL PRODUCTION OF COAL FROM MINES IN THE PROVINCE OF ALBERTA

The following table is taken from a report prepared by the Dominion Bureau of Statistics and published in "Coal Statistics for Canada" for the year 1943:

Calendar Year	Short Tons	Value
1886	43,220	\$ 81,112
1887	74,152	157,577
1888	115,124	183,354
1889	97,364	179,640
1890	128,753	198,298
1891	174,131	437,243
1892	178,970	460,605
1893	230,070	586,260
1894	184,940	473,827
1895	163,885	382,526

*The sum of Canadian coal-mine sales, colliery consumption, coal supplied to employees, and coal used in making coke, etc., less the tonnage of coal exported.

†Includes small tonnages from countries other than Great Britain and the United States. Deductions have been made to take account of foreign coal re-exported from Canada and bituminous coal ex-warehoused for ships' stores.

The following table shows the quantity of coke imported into Canada during the years 1942, 1943 and 1944 through ports in the Provinces, compiled from information from the Dominion Bureau of Statistics:

*These figures show the total imports and not the tonnages entered for consumption.

- (a) Includes imports into the Yukon Territory of 10 tons in July and 10 tons in October.
 (b) Consists of 9,168,428 tons imported from the United States, 380,645 tons imported from Great Britain, 43 tons imported from Alaska, 285 tons imported from Norway, 55 tons imported from Estonia and 1 ton imported from Poland.
 (c) Consists of 1,670,085 tons imported from the United States, 1,454,521 tons imported from Great Britain, 205,045 tons imported from Germany, 67,220 tons imported from Belgium and 54,447 tons imported from French Indo-China.
 (d) Includes imports into the Yukon Territory of 4 tons in April, 3 tons in May, 6 tons in June, 45 tons in July and 2 tons in October.
 (e) Consists of 10,042,127 tons imported from the United States, 149,905 tons imported from Great Britain, 9,421 tons imported from Germany, 361 tons imported from Norway, 124 tons imported from Denmark, 45 tons imported from Sweden, 35 tons imported from the Netherlands, 134 tons imported from Estonia, and 286 tons imported from Newfoundland.

- (f) Consists of 1,685,848 tons imported from the United States, 1,331,279 tons imported from Great Britain, 359,994 tons imported from Germany, 33,543 tons imported from Belgium, 122,572 tons imported from French Indo-China, 16,231 tons imported from the Netherlands, and 1,120 tons imported from China.
- (g) Includes imports into the Yukon Territory of 4 tons in March, 6 tons in May, 6 tons in June, 45 tons in July and 2 tons in October.
- (h) Consists of 12,333,378 tons imported from the United States, 56,073 tons from Great Britain, 54,061 tons from Germany, 113 tons from Norway, and 200 tons from Esthonia.
- (i) Consists of 2,003,317 tons imported from the United States, 1,134,855 tons imported from Great Britain, 258,257 tons from Germany, 8,131 tons imported from Belgium, 154,495 tons imported from Russia, 78 tons imported from Morocco.
- (k) Includes imports into the Yukon Territory of 8 tons in March, 10 tons in July and 8 tons in October.
- (l) Consists of 9,644,020 tons imported from the United States, 65,957 tons from Great Britain, 34,258 tons from Germany, and 417 tons from Japan.
- (m) Consists of 1,973,610 tons from the United States, 1,199,131 tons from Great Britain, 407,031 tons from Germany, 34,182 tons from Belgium, 14,952 tons from Russia, 19,645 tons from Morocco, 37,594 tons from the Netherlands, and 30,302 tons from French Indo-China.
- (n) Includes imports into the Yukon Territory of 15 tons in July and 8 tons in December.
- (o) Consists of 9,836,110 tons imported from the United States, 67,483 tons from Great Britain, and 20 tons from Norway.
- (p) Consists of 2,605,765 tons from the United States, 1,034,901 tons from Great Britain, 293,602 tons from Germany, and 43,537 tons from French Indo-China.
- (q) Consists of 2,643,588 tons from the United States, and 1,321,274 tons from Great Britain.

NOTE.—The table showing the number of men employed in the Anthracite Coal Field, includes employees at the briquetting plant. There has been no anthracite coal produced since 1923.

*Calculating the total per capita production for men employed underground, the tonnage mined from stripping pits was deducted and only the tonnage produced from mines was used.

It will also be noted that the tonnage used in the above and following tables does not include tonnage extracted under permit.

NOTE.—Previous to 1944 there was no coal mined in the Bituminous Field by strip-ping methods.

ELECTRICITY

The rules for the installation and use of electricity in or about mines require a return to be made to the Department on or before January 15th of each year, giving size, type and any other particulars which may be required of electrical apparatus in use above and below ground. According to the return received from the different mines, electricity was used in 76 mines in 1944. A summary of these returns regarding the horse-power of electrical apparatus in use is given below.

FATAL ACCIDENTS

George Brown, driver, age 38, on January 4th, in the mine operated by Regal Coal Co., Ltd., East Coulee, while in No. 3 Butt 10 East. He slipped and rolled under a car, causing fractured pelvis, from the effects of which he died January 6th.

James Prince, surface labourer, age 27, on February 2nd, in the mine operated by Hillcrest Mohawk Collieries, Ltd., Bellevue, while pursuing his duties as greaser on main and tail haulage. He evidently got caught at bull wheel, resulting in his death. He was found by locomotive driver.

George Doncoisne, coal buckler, age 44, on April 21st, in the mine operated by West Canadian Collieries, Ltd., Greenhill Mine, Blairmore. While in the course of his duties in 43 chute No. 2 seam he apparently was injured by coal and timber coming down on him, fracturing his skull.

Roland Levesque, driver, age 30, on May 29th, in the mine operated by the Commander Coal Company, Drumheller. Death due to asphyxia, broken ribs and lacerations. The body was found in 2 S. entry off 7 W. at intersection of 8 W., under a car, and the cause of the accident is unknown.

Daniel Utz, roller-man, age 51, on July 14th, in the mine operated by Hillcrest Mohawk Collieries, Ltd., Bellevue. It is presumed he was struck by a trip of cars in main slope, as the body was found by the side of derailed trip. Injuries were fractured skull, pelvis and compound fracture of both arms.

J. Yagar, miner, age 38, on July 17th, in the mine operated by McLeod River Hard Coal Co. (1941), Ltd., Mercoal. While trimming place, a block of coal fell, pinning him down, causing skull fracture and injury to brain, resulting in death.

Dmytro Grechylo, motorman, age 46, on August 24th, in the mine operated by the Brilliant Coal Company, Drumheller. While pursuing his duties, he was crushed between mine props and motor, causing crushed skull and chest.

Ernest S. Morochi, miner, age 42, on September 26th, in the mine operated by the Midland Coal Mining Co., Ltd., Drumheller. While loading coal in 31 pillar 19 S entry, a fall of top coal struck him, causing fatal injuries to head and chest.

J. V. Krkosky, miner, age 34, on October 11th, in the mine operated by West Canadian Collieries, Ltd., Greenhill Mine, Blairmore. While mining coal in 4 off 33 pillar No. 2 seam, he was a hit by a fall of top coal causing fractured skull, resulting in his death.

Antonio Uchergi, miner, age 60, on November 17th, in the mine operated by Mountain Park Coals, Ltd., Mountain Park. While repairing timber in 97 room section No. 2 slope, the roof caved, covering him with coal and timber, resulting in death by suffocation.
